

Dot.Cy Developments Ltd, a Microsoft Gold Certified Partner and member of the SFS Group - one of the largest financial services groups in Cyprus - has been established in 1999 and has been providing since then integrated Information Technology solutions based on Microsoft platforms and technologies in the Middle East, Gulf, and the Balkans.

Dot.Cy was the first company in the region to be appointed by Microsoft as Certified Software Advisor for Microsoft CRM and has won the "Partner of the Year for CRM Implementations" award for East Med in 2005 and 2006.

Today, we are the largest regional provider of CRM solutions based on Microsoft Dynamics CRM, specializing in implementations in the Financial Services and Telecommunications industries. Our success in delivering operational business software solutions is led by a team of qualified consultants and engineers providing many years of combined experience in business and information technology. The in-depth industry expertise of our consultants, our exceptional implementation team, the use of proven implementation methodologies, as well as our close collaboration with Microsoft regional offices guarantees a smooth and timely delivery of value-added solutions based on proven platforms and technologies.

In mid-2007, Dot.Cy became the exclusive distributor and premium implementation partner of Galeforce Solutions products in the Middle East, East Europe and Africa.

GaleForce CRM for Financial Services extends Microsoft Dynamics CRM deep into the financial services industry. Galeforce CRM delivers industry-specific sales and marketing, process automation, and customer service functionality for the financial services while using Microsoft Dynamics CRM as its base platform.

Apart from Customer Relationship Management solutions, Dot.Cy is a premier provider of software for the financial services industry. Our product portfolio includes back-office solutions for brokerage houses, online stock trading systems, asset management software, as well as a powerful real-time quotes platform - Intelistock. Today, Dot.Cy is a major data vendor of the Cyprus, Athens, and Romania Stock Exchanges while our affiliated company In2Sol is a data vendor of the Riyadh Stock Exchange.

Dot.Cy is headquartered in Nicosia, Cyprus, with regional offices in Bucharest, Romania. Dot.Cy promotes and markets Galeforce CRM as well as the rest of the financial software portfolio in Saudi Arabia via In2Sol, a Riyadh-based information technology organization.

Integrated Information Technology Solutions

Solutions

Microsoft Dynamics CRM for Financial Services

GaleForce CRM for Financial Services provides industry-specific sales and marketing management, process automation and customer service functionality, based on Microsoft Dynamics CRM. It's CRM "purpose-built" for financial services.

GaleForce CRM for Financial Services was designed for retail and commercial banks, wealth management, investment banking and capital markets firms, for fast, easy deployment.

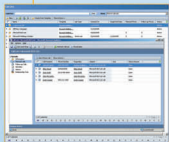

GaleForce CRM for Financial Services works natively within Microsoft Outlook, and can integrate seamlessly with Microsoft Office, Microsoft Sharepoint, as well as Microsoft BizTalk Server.

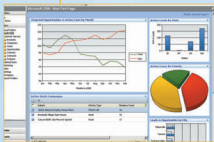

Key Benefits of GaleForce CRM for the financial services industry:

- ✔ 360-Degree Client View: All customer information including preferences, transactions, holdings, and communications history are captured and managed within a single interface.
- ✔ Manage Leads & Opportunities: Define key sales cycle and status criteria in CRM, and use the system to automate sales cycle activities, such as call lists and plans, marketing activities, and follow-up actions or tasks required.
- ✔ Automate Team and Role-based Processes: Use extended functionality and features to associate permissions and access to critical data to specific members of your organizations, and automate sales processes within the system.
- ✔ Generate Executive Reports: Create custom reports, summarizing sales and marketing activity based on the specific needs of your management team.
- ✔ Regulatory Compliance & Security: Use Auditing and Field Level Security Enterprise Modules to ensure your organization can maximize the sophistication by which it shares and manages client data, while complying with industry regulations and privacy legislation.

Backoffice and Asset Management System

Dot.Cy's back-office and asset management system was designed to address the requirements of modern brokerage houses as well as asset management firms. Multiple asset classes, stock exchanges and currencies are supported while portfolio positions can be consolidated at all levels and in any currency. Robust security module, user-definable transaction codes, link with ERP packages, definition of complex benchmarks, strong end-user reporting as well as OLAP reporting, and fast execution of user queries make the system an excellent fit for the needs of mid-size brokerage and asset management firms. The platform is also fully integrated with Dot.Cy's online stock trading system.

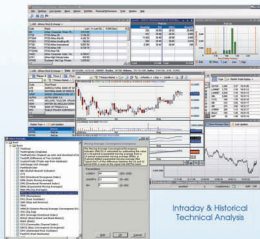

Intelstock Real-Time Quotes

Intelstock is a powerful, subscription-based software platform for delivering streaming stock exchange data for the Cyprus, Athens, and Bucharest Stock Exchange. It is also available in Saudi Arabia under the brand name eStock.

Utilising advanced technologies and based on Microsoft's .NET architecture, Intelstock focuses in providing professionals and individual investors with all the tools and data they need to make informed and quick trading decisions. The system provides real time and interactive display of market information in a concise, easy to use, and intuitive graphical user interface.

Intelstock differentiates itself from leading international information providers as its services are customer driven and aim to fully cover the needs of investors who would like to trade on local exchanges. Intelstock is designed to run on standard desktop computers and laptops without the need for any dedicated hardware infrastructure. Financial professionals can start using Intelstock by subscribing to the service and downloading and installing the software platform. A standard internet connection is needed and the system can be accessed from any geographical location.

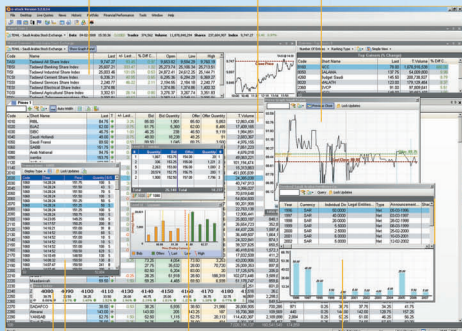

In addition to real time quotes, IntelStock provides access to a continuously growing data bank with information such as company announcements, company calendar, and historic stock prices. Advanced charting techniques, real-time and historic technical analysis, real-time Metastock technical analysis, live link to Excel, real-time portfolio valuation, and ease of installation and maintenance assures that IntelStock will exceed your expectations.
